---

## Projects

### 921Steak

[Github](#) | [Website](#)

- Fullstack restaurant website built by a team of three developers
- Styled with react components for modularity and scalability
- Designed with Django for user token authentication and features full CRUD functionality for modular menu
- Deployed RESTful API tested with Postman

### Vaxine

[Github](#) | [Website](#)

- Front end React application built for scheduling Coronavirus vaccination appointment in New York
- Built by a team 6 comprised of developers and UX designers during a three day hackathon
- Built with Figma, modern UX design principles, and React Hooks for form submission

### Portfolio

[Github](#) | [Website](#)

- Front-end React application built from scratch
- Designed with React-icons, styled components, and image carousel
- Built with React Hooks

### Flipcards

[Github](#) | [Website](#)

- Vanilla JavaScript flip-card memory game
  - Built with DOM manipulation for game winning conditions
  - Features dark mode toggle and CSS animations
- 

## Experience

### Tock

*Account Manager (April 2019 - September 2020)*

*Chicago, IL*

- Used knowledge of HTML, CSS, and JavaScript to assist restaurants with uploading the Tock booking widget
- Project lead and majority contributor for 32 page new hire onboarding & product training/FAQ document for use across all departments
- Collaborated with Directors of Account Management and Implementation Engineers to revamp and streamline reporting of sensitive reservation information and guest data visualization through the user dashboard

### Crafty

*Account Manager (July 2017 - April 2019)*

*Chicago, IL*

- Leveraged analytical skills for reporting on consumption metrics at the per-person level for consumables and paper
- Led quarterly business reviews per client to review budgetary spending and future proposals
- Managed a book of business including 12+ accounts and 5 - 10 hourly employees daily

### Fooda

*Operations Coordinator (October 2016 - July 2017)*

*Chicago, IL*

- Analyzed and developed daily delivery routes to ensure high quality delivery standards were continuously met
  - Managed a team of 15+ delivery drivers and three associate customer happiness managers
-
